

How do I know if my septic system is working properly?  
If I ignore my septic system, will everything be all right?  
Are there any other options?

Join us at a **FREE** workshop for answers!

# Homeowner's Maintenance of Septic Systems

**Tuesday, July 29, 2014**

**6:00 PM - 8:00 PM**

**Texas A&M Central Texas**

**1001 Leadership Place**

**Killeen, Texas**

Please Pre-Register to:

254-774-6008 or [lprcin@brc.tamug.edu](mailto:lprcin@brc.tamug.edu)

This course provides a basic understanding of the operational and maintenance activities of septic systems and explains how your day to day activities impact your septic system. Presentations cover the treatment processes, health and safety considerations, and how to maintain your system. This course also provides answers to the most frequently asked septic system questions, including when to pump out a tank and what can or cannot go down the drain.

## For More Information Contact:

Lisa Prcin, Watershed Coordinator
